SUMMARY

Front-End Developer with extensive experience building applications from scratch to production. Strong problem-solving skills, attention to detail, and a collaborative team player. Thrives in dynamic environments, delivering high-quality solutions. Also has foundational knowledge of backend development and mobile frameworks, offering a broader perspective on full-stack and cross-platform solutions.

WORK EXPERIENCE

Frontend Developer   Jun 2023 - Present
DEVINNOTECH - Remote

- Built and deployed production-ready projects from scratch using Next.js and React.js.
- Redesigned an existing project, improving user experience and modernizing the interface.
- Upgraded Next.js to the latest version, ensuring performance and feature enhancements.
- Added 5 languages, including Arabic, and adapted the layout for right-to-left text.
- Wrote unit tests using React Testing Library and Jest to ensure code reliability.

Frontend Developer   Apr 2021 - Jun 2023
Armsoft - Yerevan, Armenia

- Developed a business automation platform as part of a startup team, tailored to company-specific designs and requirements.
- Delivered custom solutions for individual projects, ensuring alignment with client needs and goals.
- Took responsibility for optimizing performance, implementing tree shaking, and improving project efficiency.
- Proposed and implemented a project structure shift to FSD, enhancing scalability and maintainability.
- Created complex animations, optimized images before sending them to the database, and introduced SCRUM methodologies to improve team workflow and project management.

Frontend Developer   Jan 2020 - Apr 2021
Cyber Tech - Yerevan, Armenia

- Simultaneously managed multiple projects, including the development of an online supermarket and a clothing e-commerce platform from scratch.
- Delivered fully functional, user-friendly solutions tailored to industry-specific requirements.
- Wrote tests in Storybook and developed a full-stack chat application using WebSockets.
- Collaborated closely with stakeholders to align product features with business goals.
- Optimized workflows and implemented best practices to enhance team productivity across projects.
